

Corner-Radius

How to make a window corner-radius tool

Note:

If the corner of your window does not have a radius of 3 Inches it will need to have a mitered corner.

Instructions

Printing

Please ensure that your printer settings are 'Print to Scale'.

Cut Out Measurement Tool

Cut along the dotted line so that you have the circular measurement tool.

Measure Window Radius

The circle should fit cleanly in the corner of your window to insure that the window has a radius of 3 Inches.
